OZO-NATOR

Keeping It Clean

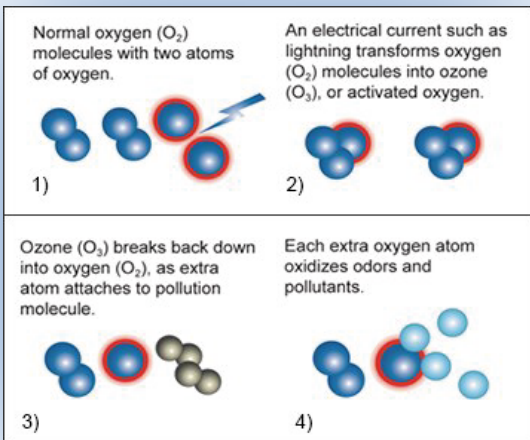

THE NATURAL CHOICE

OZO-NATOR

Keeping It Clean

THE OZONE STORY

Ozone also referred to as activated oxygen or trivalent oxygen is created naturally in our environment either through electricity, photosynthesis or by ultraviolet radiation from the sun. It is often referred to as nature's own purifier, and makes up approximately 20% of the air we breathe. Ozone is created when one of these forces cause Oxygen to split into two separate atoms. The freed atom then attaches itself to a O₂ molecule, recombining to create Ozone.

Natural Ozone makes up approximately 20% of the air we breathe every day. Ozone is created when one of these forces cause Oxygen to split into two separate atoms. The freed atom then attaches itself to a O₂ molecule, recombining to create Ozone.

Ozone actually searches out and destroys problem gases. It will react with contaminants (germs included) in the air, water, fabrics and on other surface of the walls and ceilings. Ozone generators also produce large quantities of ions via the corona discharge. The ions cause the dust particles to agglomerate (bind), and precipitate from the air leaving a cleaner environment.

OZO-NATOR

Keeping It Clean

ABOUT THE OZO-NATOR

The OZO-NATOR is a small programmable unit that emits pure Ozone.

This action simulates the way Nature cleanses the air.

The OZO-NATOR is designed to be set at safe levels not exceeding the FDA, OSHA and NIOSH recommendation of 0.05ppm.

The OZO-NATOR is a proudly South African product.

The unit's component system has been tried and tested in operation for over 10 years and comes with a full 12 x month warranty.

Ozone is an internationally used oxidant for the neutralisation of major bacteria, viruses, odours, pollen and tobacco smoke.

It has been widely used in:

- wash-rooms,
- hospitals,
- restaurants (front and back of house),
- beauty and hair salons,
- dry goods and food processing factories – improving hygiene and shelf life of perishables

PLUS it is a great way to keep the home free of germs.

Custom systems are available to industry by special order.

OZO-NATOR

Keeping It Clean

SUMMMARY

- Manufactured in RSA
- Simple, light weight, compact and easy to install
- Low power consumption
- Programmable to suit application / room size / amount of ozone needed
- Includes a day/night sensor for custom applications
- Flame retardant plastic housing
- Discrete - silent operation, ergonomically friendly
- NO maintenance required
